

RapidRatings

Understand the financial health of your vendors and counterparties.

In light of emerging compliance requirements, regulations, and “know your customer” policies, it has become more important than ever to monitor the financial stability of your counterparties and vendors.

How Financial Health Ratings (FHR®) can help your team:

Maintain meticulous records

Deep analysis and detailed reports provide a thorough and irrefutable audit trail to facilitate best practices for governance, risk, and compliance.

Better manage vendor relationships

Actionable signals help to analyze both current and prospective vendors. They are straightforward and easy to interpret, and fit seamlessly into your existing workflows.

Evaluate entire portfolio consistently

We can rate your public and private vendors on exactly the same basis – regardless of size, industry, or geographic location.

Minimize costly surprises

Studies show that FHRs provide earlier and more accurate warning signals than traditional risk tools: 90% of defaults occur among companies rated High Risk or Very High Risk.

Improve efficiency

Allocate your internal resources for greatest efficiency: Allow your team to focus on the most critical vendor relationship issues while leveraging us for financial analysis.

Receive rapid turnaround

Our fully automated system can produce, verify, and update ratings within 24 hours of receiving new public or private company financial data.
